## FAQ

**Q: Can I charge different prices for the same product on different marketplaces with my Amazon Europe marketplaces account?**

A: Yes you can.

**Q: Are there any tax implications if I use EFN?**

A: We advise you to check with your local tax adviser concerning tax implications and to comply accordingly.

**Q: Will my EFN orders be eligible for fast delivery options to customers and Amazon Prime?**

A: Only orders originating from your home marketplace or from a marketplace where you hold stock through our MCI programme will be eligible for 1-day delivery and other fast delivery options. All orders will be eligible for Amazon Prime, regardless of marketplace.

**Q: What is the FBA Export to EU option? When does it make sense to use the FBA Export to EU option and when EFN?**

A: With the FBA Export to EU option, you simply list your products for sale on [Amazon.co.uk](#), and when out-of-country customers place orders, Amazon picks, packs and delivers non-media items EU wide and media items worldwide, again from your local inventory in Amazon's fulfilment centres and currently at no extra charge to you. This is subject to change within 30 days' notice. With EFN you can also make your products available for sale on other Amazon EU marketplaces from one seller account with shipment originating from your local inventory pool.

#### FAQ

**Q: Can I charge different prices for the same product on different marketplaces with my Amazon Europe marketplaces account?**

A: Yes you can.

**Q: Are there any tax implications if I use EFN?**

A: We advise you to check with your local tax adviser concerning tax implications and to comply accordingly.

**Q: Will my EFN orders be eligible for fast delivery options to customers and Amazon Prime?**

A: Only orders originating from your home marketplace or from a marketplace where you hold stock through our MCI programme will be eligible for 1-day delivery and other fast delivery options. All orders will be eligible for Amazon Prime, regardless of marketplace.

**Q: Am I obliged to use EFN to fulfil my international FBA orders?**

A: No, but you can take advantage of our [Multi-Country Inventory \(MCI\)](#) program, which allows you to inbound items directly to Amazon fulfilment centres in the EU. With MCI you will pay the domestic fees of the country where you have your inventory (lower than the Fulfilment Fee for EFN) and your products will be closer to the customers who order them, making them eligible for Prime 1-day delivery which can help boost your sales.

**Q: What is the FBA Export to EU option? When does it make sense to use the FBA Export to EU option and when EFN?**

A: With the FBA Export to EU option, you simply list your products for sale on [Amazon.co.uk](#), and when out-of-country customers place orders, Amazon picks, packs and delivers non-media items EU wide and media items worldwide, again from your local inventory in Amazon's fulfilment centres and currently at no extra charge to you. This is subject to change within 30 days' notice. With EFN you can also make your products available for sale on other Amazon EU marketplaces from one seller account with shipment originating from your local inventory pool.

**Q: Are there any long-term inventory storage fees?**

A: A semi-annual [Long-Term Storage Fee](#) of £882.50 per cubic metre (£25 per cubic foot) will be applied to any units that have been stored in an Amazon fulfilment centre for one year or longer. The fee is in addition to the regular Inventory Storage Fee and will not be charged if a request has been made to remove or dispose of the units prior to the fee being charged. Storage fees are charged for all units stored in an Amazon fulfilment centre based on calendar month and your daily average volume (measured in cubic metres). The cubic metre of any unit will be based on the unit's size as properly packaged and ready for shipment to customers in accordance with the FBA Programme Policies. Amazon will be entitled to make its own measurement of the cubic metre or weight of any packaged unit or representative sample thereof and in the event of any conflict between such measurement and information provided by seller, Amazon's measurement will govern. Actual storage fee is calculated on a per foot basis and rounding variances may occur.

**January to September: £0.30      October to December: £0.40**

**Note:** Selling on Amazon fees are applicable on top of the FBA fees. All fees are exclusive of VAT and other taxes that are payable by the seller.

**FAQ**

**Q: Can I charge different prices for the same product on different marketplaces with my Amazon Europe marketplaces account?**  
A: Yes you can.

**Q: Are there any tax implications if I use EFN?**  
A: We advise you to check with your local tax adviser concerning tax implications and to comply accordingly.

**Q: Will my EFN orders be eligible for fast delivery options to customers and Amazon Prime?**  
A: Only orders originating from your home marketplace or from a marketplace where you hold stock through our MCI programme will be eligible for 1-day delivery and other fast delivery options. All orders will be eligible for Amazon Prime, regardless of marketplace.

**Q: Am I obliged to use EFN to fulfil my international FBA orders?**  
A: No, but you can take advantage of our [Multi-Country Inventory \(MCI\)](#) program, which allows you to inbound items directly to Amazon fulfilment centres in the EU. With MCI you will pay the domestic fees of the country where you have your inventory (lower than the Fulfilment Fee for EFN) and your products will be closer to the customers who order them, making them eligible for Prime 1-day delivery which can help boost your sales.

**Q: What is the FBA Export to EU option? When does it make sense to use the FBA Export to EU option and when EFN?**  
A: With the FBA Export to EU option, you simply list your products for sale on [Amazon.co.uk](#), and when out-of-country customers place orders, Amazon picks, packs and delivers non-media items EU wide and media items worldwide, again from your local inventory in Amazon's fulfilment centres and currently at no extra charge to you. This is subject to change within 30 days' notice. With EFN you can also make your products available for sale on other Amazon EU marketplaces from one seller account with shipment originating from your local inventory pool.

**Q: Are there any long-term inventory storage fees?**  
A: A semi-annual [Long-Term Storage Fee](#) of £882.50 per cubic metre (£25 per cubic foot) will be applied to any units that have been stored in an Amazon fulfilment centre for one year or longer. - Pick & Pack Fee** (flat fee per unit)
- Weight Handling Fee** (variable per shipment fee based on weight and dimensions)
- Storage Fee** (per cubic foot per month - pro rata charges)

With Multi-Channel Fulfilment, the FBA fees vary when you:

## A - Fees for orders fulfilled from the UK to the UK

### 1. PICK & PACK FEE (flat fee per unit)

£4.50

### 2. WEIGHT HANDLING FEE

(variable per shipment fee based on weight & dimensions)

To use the chart, simply take **your product's dimensions (in centimeters)** and its **Outbound Shipping Weight\* (in grams)** and compare them with the first row in the table below. If your product's package dimensions (any side) or Outbound Shipping Weight exceed any of the maximum values listed, move to the next largest tier (row).

		<b>Standard Oversize Rates + £3.00</b>		

\*For Multi-Channel Fulfilment above 2.2 kg for standard shipping and above 1.5 kg for expedited, the per pence charge is rounded up to the nearest pence.

Weight handling determines a shipping method. For shipments with mixed unit types, use the highest applicable fee. The total billable weight (Outbound Shipping Weight) will equal the weight of the packaging plus the sum of the weights of each shipment item, the total of which is then rounded up to the nearest 1 g. The weight of the packaging (Packaging Weight) will be: Small Envelope - 20 g, Standard Envelope - 40 g, Standard Parcel - 120 g, and 240 g for Small Oversize, Standard Oversize, and Large Oversize items. A shipment will be charged the entire per shipment fee for the band in which it qualifies. ### 3. STORAGE FEE (per cubic foot per month - pro rata charges)

Storage fees are charged for all units stored in an Amazon fulfillment centre based on calendar month and your daily average volume (measured in cubic metres). The cubic metre of any unit will be based on the unit's size as properly packaged and ready for shipment to customers in accordance with the FBA Programme Policies. Amazon will be entitled to make its own measurement of the cubic metre or weight of any packaged unit or representative sample thereof and in the event of any conflict between such measurement and information provided by seller, Amazon's measurement will govern.
